HB510XL & HB610 also available in silver for additional £80 on HB510XL & £85 on HB610. ** Additional alloy wheels £106 per wheel. † For telescopic partition only.

Flexibility when loading & unloading

Our high grip front and rear ramps are extremely tough and resilient for the safe loading and unloading of your horse. Superbly balanced, they are light and easy to open and close – an important consideration for the horsebox owner. Once inside the horsebox, the side walls are protected by tough polypropylene padded kickboards. The aluminium floor offers a lightweight but strong platform, guaranteed not to rust or rot for additional peace of mind.

Stability when towing

All our horsebox trailers feature an exclusive beam axle and leaf spring suspension system which has been developed and refined for a safe and stable ride. Renowned for its durability and ease of maintenance the Ifor Williams beam axle system contributes significantly to the low depreciation of our horseboxes.

Safety & comfort when moving

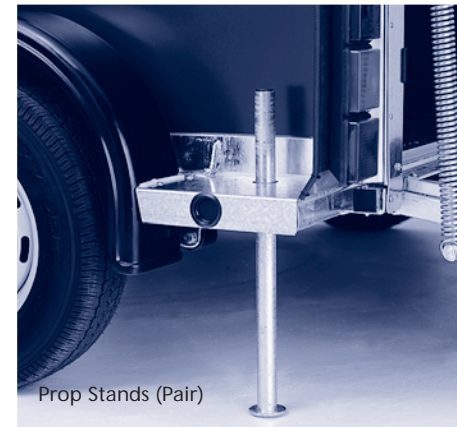

To ensure your horse is restrained securely and safely whilst travelling, the breast and breeching bars have multiple positions for length and two height positions. Interiors offer durable, yet comfortable side padding, and the heat-reflecting aluminium roof helps keep your horse cool, even in the height of summer.

Minimal upkeep - built to last

The galvanised steel chassis and drawbars offer unbeatable corrosion protection. All our horseboxes are security marked and data tagged to deter the would-be thief and every detail is specified for top performance and a long, trouble free life.
